PREFACE.

THE Collection of Aes Grave with the sale of which we have been entrusted is well-known to all collectors of that special series. It was commenced by Louis Sambon, the author of *Recherches sur les Monnaies de la presqu'île Italique*, 1870, and continued by his son, Commendatore Jules Sambon, who, during his long residence in Italy, had exceptional opportunities to acquire the finest and rarest specimens which now and then turn up in that country. On the decease of Jules Sambon the collection passed into the hands of his son, the eminent bacteriologist, Dr. Louis Sambon, whose services to medical science, in connection with the discovery of the origin of malaria and with cancer research have made his name famous. He intends to devote the proceeds of this sale to his further investigations.

A glance through the plates of illustration to this catalogue will suffice to give an idea of the importance of the collection.
